### ITINERARY

#### Day 1

##### Val Ferret - Lavachey - Refuge Bonatti

The Italian Val Ferret parallels the South face of Mont-Blanc range. An easy and varied snowshoe circuit leads us to the hamlet of Lavachey. In the afternoon, we'll hike up to Bonatti hut first crossing a larch forest, and then reaching the open lands over the tree limit. Bonatti hut was built in 1998. It is probably the only refuge of its kind regarding comfort and space. Hot showers, comforters, large dormitories, walls decorated with numerous pictures of Walter Bonatti's adventures.

*Elevation gain : 400m / 1 320ft.*

#### Day 2

##### Refuge Bonatti - Vallon de Malatra

Above the Refuge, Malatra's bowl is a perfect playground for snowshoeing. Wherever we look at, the views are breathtaking ! According to weather or snow conditions and our motivation, we'll adapt the length of the hike before going back down to the Val Ferret. Back to Chamonix around 5pm.

## EQUIPMENT

We recommend you to pay particular attention to the choice of your equipment. It contributes greatly to the success of your stay. Weight is decisive: you always have to evaluate the ratio weight/comfort, to find the best compromise. In a general way, it is better to pile up several light coats rather than wear one big clothing.

### Hiking boots

- Boots for snowshoeing should be warm and waterproof. They should also provide high ankle support. New boots should be

worn a couple of times before.

- If your feet tend to get blisters easily, you can apply baby talc on dry feet in the morning before wearing your socks.

### **Back-pack**

- Minimum size 35 L (a back-pack with extra room is better than too small).

- Once everything is packed, make sure there is enough room to fit your picnic lunch.

- Although backpack covers are very convenient in bad weather, we recommend using a very large plastic bag as a pack-liner to protect your personal belongings from getting wet.

### **Clothing**

Underwear : avoid using cotton. Compared to technical synthetic material, it is heavier and it dries slowly. Wool is also getting popular amongst sportswear brands. Synthetic and wool are warmer ; they dry fast, and allow you to pack light.

### **Carrying weight**

Taking enough time to pack is essential, as you are going to carry every item for several days in a row. Avoiding extra weight can easily be done by packing your clothes tightly, placing heavy items at the bottom of the pack, and avoiding empty spaces. As a result weight is better spread throughout your back and weight impression diminished).
