EQUIPMENT

We recommend that you take special care in choosing your equipment because it contributes greatly to the success of your trip. As alpine conditions can be highly variable with sudden changes, it can get very cold in altitude, it is preferable to have numerous layers rather than one thick piece of clothing. It is not uncommon to have snow in the middle of summer, do not skimp on warm clothes even if the weather seems favourable. Contrarily, the sun can be scorching hot. Without weighing too much, you should always have sufficient equipment in your backpack to deal with the capricious and severe weather.

Back-pack

- 20L / 25L backpack (for biking) - Provide enough space for the picnic. A word of advice in case of rain: even if you have an over-backpack, always protect your belongings in a plastic bag inside the backpack.

For added comfort regarding underwear, (t-shirts, boxers, socks), avoid cotton which is heavy, cold and dries very slowly. Opt for synthetic technical fabrics or wool, which is making a comeback. They are warmer and dry quickly.
